The Solution is Clear with Riveer™

APECS™ AUTOMATIC PAVING EQUIPMENT CLEANING SYSTEM

CUT YOUR CLEANING SOLVENT COSTS UP TO 80%

APECS automatically cleans asphalt and bituminous road oil from paving equipment, oil distributors, compactors and tools. Used by DOT's and paving contractors, APECS' unique spray pattern power washes with cleaning solutions or solvents, then recirculates the solution for reuse. APECS zero discharge technology includes a diaphragm pump to recover discharged solvent *before* it reaches the ground.

APECS keeps road crews out of the cleaning business, away from fumes and on to more productive tasks, while giving you more cleaning power-per-gallon of your cleaning solution. And, because APECS is automatic, crews are more likely to keep equipment clean, increasing your return on investment.

Simple to operate, APECS reclaims terpenes, soys, or solvents. Stop sending thousands of dollars of chemistry down the drain. APECS can save you time and money while keeping your yard clean and compliant.

- EPA COMPLIANT, ZERO DISCHARGE
- IDEAL FOR PAVERS, DISTRIBUTORS, EQUIPMENT, AND TOOLS
- COMPLETE PLUG & PLAY PACKAGE
- REDUCE CHEMICAL CONSUMPTION UP TO 80%

APECS™ SPECIFICATIONS

Settling Tank: 450 – 1,000 gallons
