

TANK WASHER For 20lb LPG Tanks

The Riveer Tank Washer is a compact, automated conveyor system to wash LP and other cylindrical tanks. The system will automatically wash and pretreat your new and used tanks by removing labels, mud, grease and other debris. The system is designed to meet any pretreatment and cleaning needs while making the operators' job as easy as hanging the part and pressing start. Designed to cut down cleaning time, reduce the required manpower and provide a clean and ready to paint tank, this system can be customized to meet any of your tank cleaning needs.

RIVEER TANK WASHER EXCLUSIVE FEATURES

1. Completely recycled zero discharge cleaning process
2. High pressure wash removes labels, grease, and debris
3. Explosion proof components
4. Built in gas leak detection
5. Fully automated tanks cleaning system for new and used LP tanks
