TRUCK WASH

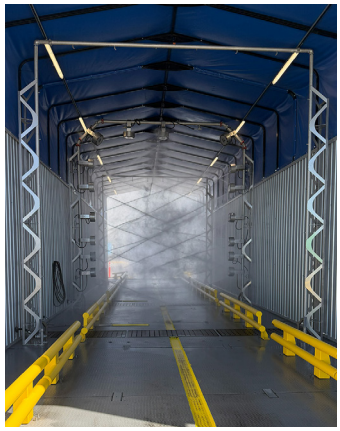

For Truck and Trailer

Riveer's Automatic Truck Wash Systems are engineered to deliver consistent cleaning performance, reduce labor requirements, and improve fleet throughput. A fresh water savings of 85% over standard truck washes, Riveer's touchless, automatic truck wash uses less than 60 gallons of fresh water per trailer by utilizing Riveer's unique water capture and recycling systems.

Designed for demanding commercial and industrial environments, each system can be configured around your vehicle types, site conditions, operational goals, and water-management requirements.

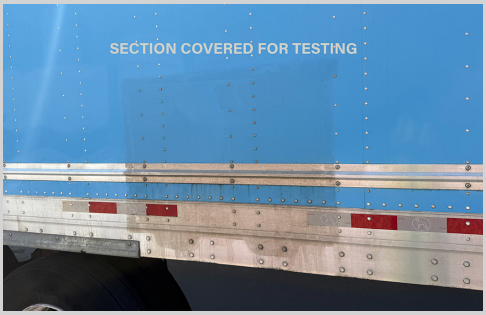

RIVEER TRUCK WASH EXCLUSIVE FEATURES

1. Undercarriage Spray reaches and removes surface debris from hard-to-access areas.
2. High pressure wash arches remove mud, grit, salt and other debris.
3. Fully automatic, designed to operate unattended.
4. Containerized, Above Ground System can be relocated as needed.
5. Closed Loop System or drain options available.

Removes road film and other surface debris from trucks and trailers, improving appearance and cleaning safety features.
